Global Offerings

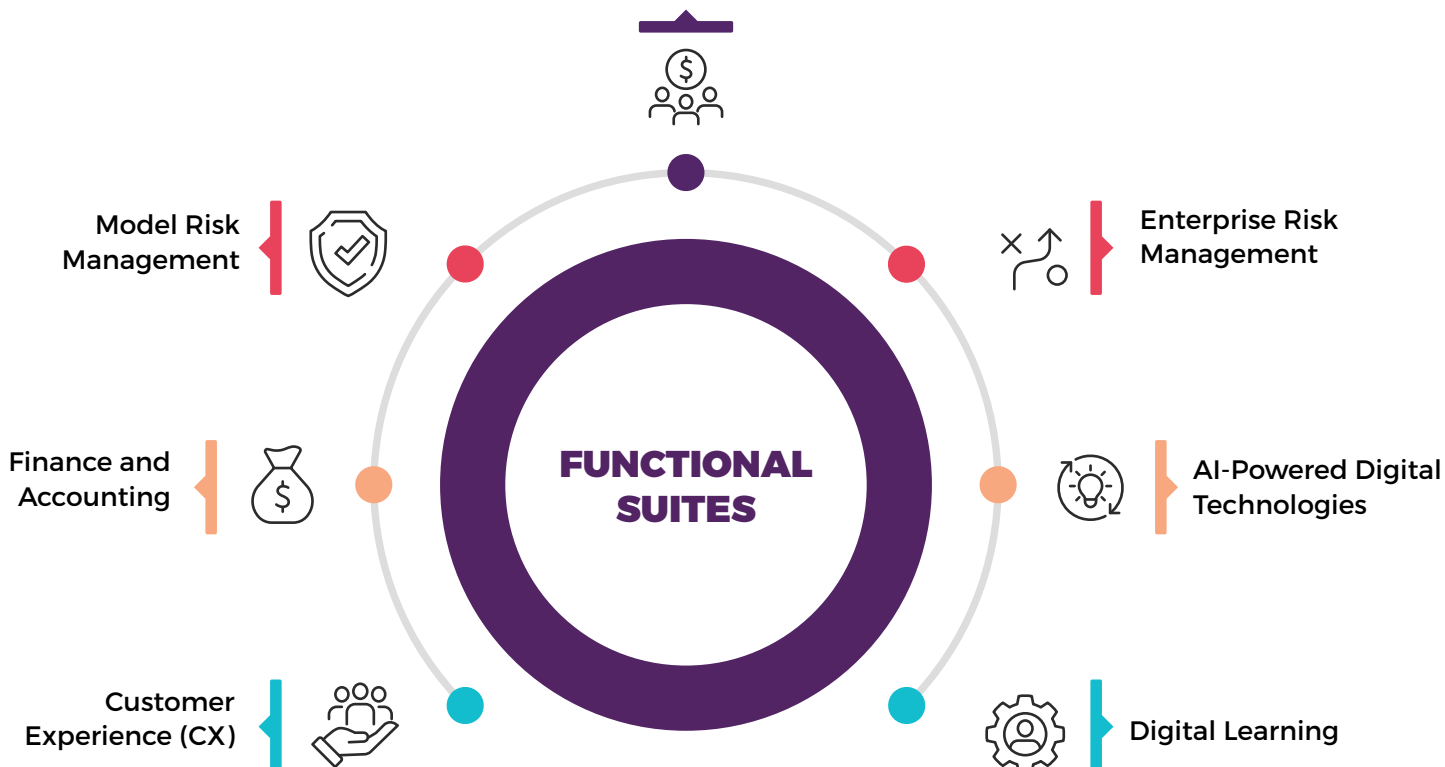

Our Solutions At A Glance

Proprietary Digital Solutions

Financial Crime Compliance

Transform Business Operations

Mortgage Lending

Services for mortgage origination, underwriting, closing, title and settlement, and servicing. Leverage RPA and AI-driven document processing to enhance efficiency and ensure compliance.

Deposit and Payment

Transform onboarding, exceptions processing, disputes management, card risk management, and more. Leverage our operational expertise and digital solutions to drive efficiencies and compliance.

Commercial Lending

Streamline real estate lending, SME lending, renewable loans, commercial credit risk, and more with our global delivery capabilities powered by AI-based digital solutions and domain expertise.

Insurance

Deliver services across the Property and Casualty and Life and Annuities segments, including claims management, agent services, new business, and policy administration.

Wealth and Investment Management

Maximize the efficiency and margin for clients using advanced WealthTech solutions, investment operations, fund administration, predictive analytics, robo advisory solutions, and more.

Proprietary Digital Innovations

AI/ML-powered AML solution for real-time transaction monitoring, global watchlist screening, PEP matching, and alerts investigation.

Digital Learning and Knowledge Management solution for accelerated skilling, knowledge curation, and employee retention.

Cloud-based Power BI® digital performance dashboard for real-time business insights and data visualization.

Suite of custom-built digital tools and utilities for optimizing business process efficiencies.

Accelerate Business Functions

Financial Crime Compliance

Combat money laundering and other financial crimes using advanced fraud analytics, CIP and KYC services, AML/CFT reinforcement, regulatory reporting, crypto accounting, RegTech solutions, and more.

Enterprise Risk Management

Manage critical business risks with key/non key control design and testing across the Three Lines of Defense. Enable robust policy governance, perform reporting, oversight, quality control, and more.

Model Risk Management

Manage model risks using credit modeling techniques, advanced predictive analytics, and cloud-native data fabric. Leverage model development, documentation, implementation, and validation services.

Digital Learning

Upskill workforce with Fluent, our digital learning and knowledge management solution that offers easy and scalable deployment, rich knowledge libraries, gamification, learning analytics, and more.

Customer Experience (CX)

Drive "Moments of Truth" with personalized experiences across touchpoints. Leverages data analytics, AI-powered automation, and human expertise to drive customer engagement and retention.

Finance and Accounting

Transform your "Office of the CFO" with our AI-enabled and domain-led solutions for financial reporting and compliance, global accounting, financial modeling, FP&A, recordkeeping, and more.

AI-Powered Digital Technologies

Transform banking and financial services with artificial intelligence, AI-powered platforms and applications, digital process automation, AI-led data and analytics, and technology consulting.
